

Contents

Part I: Introduction

<i>Chapter 1: N. Smith</i> , Perspectives from the Global Ocean Data Assimilation Experiment	1
--	---

Part II: Modeling

<i>Chapter 2: S. Griffies</i> , Some ocean models fundamentals	19
<i>Chapter 3: A.M. Tréguier</i> , Models of ocean: Which ocean?	75
<i>Chapter 4: R. Bleck</i> , On the use of hybrid vertical coordinates in ocean circulation modeling	109
<i>Chapter 5: E. Blayo and L. Debreu</i> , Nesting ocean models	127

Part III: Oceanographic observations and atmospheric forcing

<i>Chapter 6: I. Robinson</i> , Satellite measurements for operational ocean models	147
<i>Chapter 7: U. Send</i> , In-situ observations: Platforms and techniques	191
<i>Chapter 8: S. Pouliquen</i> , In-situ observations: Operational systems and data management	207
<i>Chapter 9: W. Large</i> , Surface fluxes for practitioners of global ocean data assimilation	229

Part IV: Data assimilation

<i>Chapter 10:</i> P. Brasseur , Ocean data assimilation using sequential methods base on the Kalman filter	271
<i>Chapter 11:</i> I. Fukumori , What is data assimilation really solving, and how is the calculation actually done?	317
<i>Chapter 12:</i> F. Rabier , Importance of data: A meteorological perspective	343
<i>Chapter 13:</i> D. Anderson, M. Balmaseda, and A. Vidard , The ECMWF perspective	361

Part V: Systems

<i>Chapter 14:</i> P. Bahurel , MERCATOR OCEAN global to regional ocean monitoring and forecasting	381
<i>Chapter 15:</i> M. Bell, R. Barciela, A. Hines, M. Martin, A. Sellar, and D. Storkey , The Forecasting Ocean Assimilation Model (FOAM) system	397
<i>Chapter 16:</i> E. Chassignet, H. Hurlburt, O.M. Smedstad, G. Halliwell, P. Hogan, A. Wallcraft, and R. Bleck , Ocean prediction with the HYbrid Coordinate Ocean Model (HYCOM)	413
<i>Chapter 17:</i> A. Schiller and N. Smith , BLUElink: Large-to-coastal scale operational oceanography in the Southern Hemisphere	427
<i>Chapter 18:</i> J.F. Minster , Operational oceanography: A European perspective	441
<i>Chapter 19:</i> Y. Desaubies , MERSEA: Development of a European ocean monitoring and forecasting system	449
<i>Chapter 20:</i> L. Crosnier and C. Le Provost , Internal metrics definition for operational forecast systems inter-comparison: Example in the North Atlantic and Mediterranean Sea	455
<i>Chapter 21:</i> J. Harding and J. Rigney , Operational oceanography in the U.S. Navy: A GODAE perspective	467
<i>Chapter 22:</i> M. Altalo , Applications of ocean forecast information for economic advancement in developed and developing societies	483

<i>Chapter 23: B. Hackett, Forecasting the drift of objects and substances in the ocean</i>	507
<i>Chapter 24: A. Oschlies, On the use of data assimilation in biogeochemical modelling</i>	525
<i>Chapter 25: J. Wilkin and L. Lanerolle, Ocean forecast and analysis models for coastal observatories</i>	549
<i>Appendix</i>	573
<i>Index</i>	575
